S.N.V. Thrinadh

Full-Stack Developer | Multi-Tenant SaaS & CRM Architect

Andhra Pradesh, India • +91 8790221589 • nagavenkata2151@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

High-impact **Full Stack Developer** with **3+ years of experience** engineering and scaling production multi-tenant CRM and SaaS platforms using **Node.js, Express.js, React.js, Prisma ORM, MySQL, and Redis**. Specialized in multi-tenant database routing (Shared DB, Isolated Schema, Dedicated RDS), custom Prisma tenancy proxies, in-app VoIP telephony (Exotel/Twilio WebRTC), and event-driven omnichannel lead ingestion (Meta Lead Ads Webhooks). Proven history of delivering high-concurrency RESTful APIs (120+ endpoints), enterprise security (AES-256 PII blind indexing, single-active-session takeover, AWS SNS 2FA), and responsive micro-frontend dashboards. Highly proficient with AI-assisted software development workflows (Cursor, Claude, Copilot) to accelerate delivery velocity while maintaining architectural excellence.

TECHNICAL SKILLS

Backend & APIs: Node.js, Express.js, RESTful Architecture, AsyncLocalStorage, BullMQ, Socket.IO, Webhooks

Frontend & UI: React.js (v18 & v19), Vite, Redux Toolkit, RTK Query, Material-UI (MUI v5), Tailwind CSS v4

Databases & ORM: MySQL, Prisma ORM ($extends Tenancy Middleware), mysql2 Pooling, HMAC Blind Indexing

Caching & Perf: Redis (Dual-Key Caching Strategy, Custom Distributed Rate Limiting, Session Stores)

Cloud & DevOps: AWS (EC2, S3, SNS, CloudFront, Route 53), PM2, Linux/Ubuntu, CI/CD Pipelines, LiteSpeed

Security & Auth: JWT, Rotating HTTP-Only Refresh Tokens, RBAC, Single-Active Sessions, AES-256-GCM, Bcrypt

Third-Party Integrations: Exotel WebRTC SDK, Twilio Voice, Meta Graph API, Nodemailer, Multer-S3, PDFKit, ExcelJS

AI-Assisted Tools: GitHub Copilot, Cursor, Claude AI, Antigravity IDE (Context Prompts, Refactoring, Code Auditing)

PROFESSIONAL EXPERIENCE

Full Stack Developer

July 2023 – Present

Creative Ethics. — Madhapur, Hyderabad, India

- **Enterprise Multi-Tenant SaaS Architecture:** Architected and deployed an end-to-end multi-tenant Real Estate CRM and Operations platform comprising a central platform orchestrator (`platform-api`), modular Node.js/Express backend, and 5 distinct micro-frontends (Main Admin, Sales Execution, Channel Partner, Facility Ops, Super Admin).
- **Dynamic Multi-Tenant Database Routing:** Engineered a tenancy isolation layer using Node.js `AsyncLocalStorage` and dynamic connection pooling supporting 3 deployment topologies: *Shared Database*, *Isolated Schema*, and *Dedicated AWS RDS*, guaranteeing zero cross-tenant data leakage.
- **Custom Prisma Tenancy Proxy:** Authored an automated JavaScript Proxy wrapping Prisma Client with `$extends` query extensions to dynamically inject tenant scopes into all CRUD operations, eliminating tenancy boilerplate across 120+ REST endpoints.
- **Dual-Key Resilient Redis Caching:** Designed a dual-key caching mechanism (`live` 24h TTL + permanent `fallback` with grace period) for tenant metadata and domain routing, achieving sub-10ms tenant resolution and ensuring continuous uptime during platform API drops.
- **Omnichannel Ingestion & Meta Ads Integration:** Built real-time Meta Lead Ads webhook pipelines with HMAC verification, deduplication algorithms, automated sales rep assignment, and multi-channel instant welcome triggers (Email via Nodemailer & WhatsApp).
- **Telephony & WebRTC CRM Calling:** Integrated Exotel WebRTC SDK and Twilio Voice SDK into the Sales Dashboard, enabling click-to-call dialing, live agent telephony status, automated call recording attachments, and interaction timelines directly within lead cards.

PROFESSIONAL EXPERIENCE (CONTINUED)

Creative Ethics. — Enterprise Real Estate Platform Engineering

- **Enterprise Security & Compliance:** Implemented Single Active Session enforcement with device fingerprinting and takeover flows (`409 Conflict` + `forceTakeover`), AES-256-GCM field-level encryption with HMAC-SHA256 blind indexing for searchable PII, AWS SNS SMS OTP 2FA, and rotating 7-day HTTP-only refresh tokens.
- **Database & Query Performance Tuning:** Optimized MySQL schemas, indexing strategies, and complex reporting aggregations (leads conversion funnels, financial vouchers, plot allocations), slashing database query response times by **35%**.
- **Micro-Frontend Modernization:** Built modular, accessible UI portals using React 18/19, Vite, MUI v5, and Tailwind CSS v4; adopted RTK Query for normalized API caching and real-time Socket.IO subscriptions for live push notifications.
- **Production CI/CD & Cloud Infrastructure:** Managed AWS EC2 deployments using PM2, S3 for secure asset storage with pre-signed URLs, and structured CI/CD workflows with automated Prisma migration guards.

KEY PROJECT HIGHLIGHTS

Enterprise Real Estate Multi-Tenant CRM & Operations Ecosystem

Node.js • React • Prisma • MySQL • Redis • AWS • Exotel • Vite

- **Multi-Tenant Platform API & Super Admin:** Centralized orchestration microservice and React 19 dashboard managing company tenant lifecycles, database credentials, custom domain mappings, and granular capability toggles (Telephony, OTP, Dashboard Access).
- **Sales Execution & Telephony Dashboard:** Complete sales pipeline portal with customizable lead lifecycles, in-app VoIP/PSTN calling, customer site visit scheduler with feedback loops, unit reservation holds, and payment receipt generation.
- **Channel Partner / Broker Network:** External broker portal providing real-time visibility into project block layouts, unit availability status, commission tracking, and client referral dispatch.
- **Facility & Post-Handover Operations:** Complete facility management platform with visitor pass generation, a public QR-code gate verification endpoint (`/public/visitor-passes/verify/:passCode`) for security guards, complaint escalation desks, and amenity booking.
- **Financial Ledger & Voucher Management:** Automated transaction billing modules generating payment receipts, commission vouchers, and exportable financial reports using PDFKit and ExcelJS.

EDUCATION

B.Tech in Mechanical Engineering
Lenora College of Engineering, Rampachodavaram | 2022

CERTIFICATIONS

AWS Certified Cloud Practitioner

Certified JavaScript Developer

AI-ACCELERATED ENGINEERING WORKFLOWS

- **Context-Driven Development & Auditing:** Leveraged advanced AI tools (Cursor, GitHub Copilot, Claude AI) for complex architectural refactoring, automated testing, static security analysis, and Docs-as-Code maintenance.
- **Velocity & Throughput:** Accelerated sprint delivery speed by **~40%** while strictly maintaining code standards, DRY principles, and system reliability.
